

INFORMATION FOR THE GAME REGARDING CORONAVIRUS (COVID-19)

Date: Friday 13 March 2020

Rugby Australia acknowledges the announcement made by the Council of Australian Governments on 13 March 2020 in reference to non-essential organised gatherings of more than 500 persons that is to take effect from Monday 16 March 2020. The Australian Government has indicated that additional information around the practical application of these new measures will be available on Monday. Rugby Australia will issue updated information once this advice and information has been provided by Government, following the scheduled COVID-19 Working Group meeting.

Coronavirus (COVID-19) is a respiratory illness caused by a new virus and symptoms can range from mild illness to pneumonia and people may experience fever, flu-like symptoms or shortness of breath. In Australia, the people most at risk of getting the virus are those who have recently been in mainland China and Iran or have been in close contact with someone who is a confirmed case of COVID-19.

COVID-19 is increasingly impacting the global community and is a rapidly evolving issue. The Australian Government's Department of Health are currently monitoring COVID-19 and providing advice that is regularly updated:

<https://www.health.gov.au/news/health-alerts/novel-coronavirus-2019-ncov-health-alert>

Rugby Australia strongly recommends that member unions, associations, clubs and participants follow the advice issued by of the Australian Government and any additional advice that is issued by their State or Territory Governments.

Additionally, the Australian Institute of Sport (AIS) are providing regular updates on their website: https://ais.gov.au/health-wellbeing/covid-19/_nocache# covid-19_and_sport_faq

The best way to prevent against the spread of infections such as COVID-19 is to practice good hygiene, including:

- regularly washing hands with soap and water;
- using a tissue and covering your mouth when coughing or sneezing;
- avoiding close contact with others if you are unwell;
- avoid sharing drink bottles;
- ensuring public spaces (such as club changing rooms) are regularly and thoroughly cleaned; and
- ensuring equipment (such as hit shields and massage tables etc.) are regularly and thoroughly cleaned.

Clubs should also be ensuring that safe hygiene practices in relation to food handling are followed in kitchens and dining facilities.

There is a risk of transmission of infections in team sport environments, therefore any participant who is currently suffering from any flu-like symptoms or is feeling unwell, regardless of their recent travel, should refrain from playing/training and should seek medical advice.

Participants should also follow the advice and restrictions set out by the Department of Health relating to isolation following travel or contact with confirmed COVID-19 cases. Any participant who is subject to the outlined travel restrictions or has been in contact with a confirmed COVID-19 case should not attend training/matches or any other club activities for 14 days following travel or contact.

Overseas rugby tours

Information about COVID-19, including overseas travel advice and restrictions, changes often and the current situation is being closely monitored by the Australian Government and the latest travel information is published here:

<https://www.smartraveller.gov.au/news-and-updates/coronavirus-covid-19>

All clubs that are planning to tour overseas should carefully consider the current advice that is available (including from the host Union) and, if a decision is made to tour, to keep abreast of the latest advice as travel dates get closer. Clubs are also advised to carefully check their travel insurance policies re: cancellations or coverage if an issue occurs overseas etc.

The health and safety of all those travelling on tour is paramount and clubs may, when considering possible tour locations, wish to look at whether a domestic tour in Australia could be a suitable option for them given the ever changing and uncertain position regarding travel advice and insurance.
